

# Bioscience Horizons

The National Undergraduate Research Journal

VOLUME 2 > ISSUE 2 > 2009

## CONTENTS

i Editorial

### RESEARCH ARTICLES

- 99 L. BELLANCA  
Measuring interdisciplinary research: analysis of co-authorship for research staff at the University of York
- 113 K. SAMANI  
Therapeutic drug monitoring: an e-learning resource
- 125 S.J. BEDFORD  
The effects of riparian habitat quality and biological water quality on the European Otter (*Lutra lutra*) in Devon
- 134 C. GREGSON  
Optimization of MALDI tissue imaging and correlation with immunohistochemistry in rat kidney sections
- 147 C. ASHER  
Patterns of genetic diversity in populations of two bat species (*Sturnira ludovici* and *Artibeus toltecus*) in Cusuco National Park, Honduras
- 155 A. KEENE  
Study of small mammal populations within two Barn owl corridors at Folly Farm
- 164 D. PARKER  
Pre- and post-copulatory mate choice in *Platygyryllus primiformis*: cryptic female choice and sexual conflict
- 172 C. SAUNDERS  
The anti-proliferative effect of different tomato varieties on the human colon adenocarcinoma cells
- 180 S. BATT  
Human attitudes towards animals in relation to species similarity to humans: a multivariate approach
- 191 I.M. IBRAHIM  
Characterizing chloroplast sensor kinase
- 197 L.F. WETHERILL  
Can ESR be used to assess the levels of oxidative stress in fat-loaded human hepatocytes and hepatic stellate cells?
- 205 H. LEE  
Differential localization of two plant homologues of Rab5 GTPases in the secretory pathway

### REVIEW

- 212 J.A.L. SHORT  
Viral evasion of interferon stimulated genes
